Ocean. U.S. Coast Guard photo. for Counter-Terrorism Studies, where she investigated criminal-terrorist nexus (e.g., in the case of “narco-terrorism”). In the 1970s, the FARC taxed marijuana growers in the rural areas it controlled. Anthony P. Placido, Assistant Administrator for Special Programs, Office of International Narcotics Control, U.S. Department of Defense, testified in front of a Senate committee in 1997 that the FARC and other guerrilla groups in Latin America had become a major threat to international security. The FARC is one of the most powerful insurgent groups in the world, with an estimated 20,000 members. The group is known for its use of guerrilla tactics, including urban guerrilla warfare, and its support for terrorist activities.

In the 1970s, the FARC taxed marijuana growers in the rural areas it controlled. The group used this revenue to fund its operations and to pay for weapons and training. The FARC also used its control of rural areas to disrupt the government's ability to provide basic services to the population, such as education and health care. As a result, many rural communities were left without access to basic services.

In the 1990s, the FARC began to expand its operations into the major cities of Colombia, where it continued to use guerrilla tactics to challenge the government. The group used its control of rural areas to disrupt the government's ability to provide basic services to the population, such as education and health care. As a result, many rural communities were left without access to basic services.
